Education

National Institute of Technology (NIT), Silchar **2025 – 2029 (Expected)**
B.Tech in Computer Science & Technology *Silchar, Assam*

- Current CGPA : 6.66 (up to 2nd Semester)

Delhi Public School (DPS), Guwahati **2020 – 2024**
Higher Secondary & Secondary Education *Guwahati, Assam*

- Class 12 (All India Senior School Certificate Examination): **86.8%**
- Class 10 (All India Secondary School Examination): **90.7%**

Technical Skills

Languages: JavaScript, Python, Go, Rust
Frameworks/Technologies: Nijor, SvelteKit, Fastify, Fiber
Databases: PostgreSQL, MongoDB

Projects

Nijor JS | *JavaScript, Open Source* **2020 – Present**

- Built an experimental frontend web framework to explore an alternative developer experience to React's JSX syntax, allowing developers to write applications using `.nijor` files with HTML-like templates.
- Implemented a file-based routing system, component architecture, and reactive rendering while exploring browser internals and framework design.
- Continuously maintained and refined the framework over multiple years to improve performance and developer experience. Server-side rendering (SSR) is currently under development.

Latin to Assamese Transliteration Tool | *JavaScript, Kotlin, Android* **2021 – Present**

- Developed a Latin-to-Assamese transliteration engine that converts Assamese typed in Latin into Assamese script.
- Built the original web application in JavaScript in 2021, enabling users to write Assamese using Latin characters.
- Expanded the project into the **Disang Keyboard**, an Android keyboard application developed in Kotlin in 2026 with real-time transliteration support.

Experience / Entrepreneurship

Rentghor **2022 – 2023**
Founder / Full Stack Developer *Guwahati, Assam*

- Built Rentghor, an online marketplace designed to connect tenants with landlords and simplify the rental discovery process.
- Designed and developed the complete platform independently, gaining hands-on experience in full-stack web development, database design, backend architecture, and frontend engineering.
- Although the product did not achieve significant adoption, the experience provided valuable insights into product development, software engineering, and the challenges of building and launching a startup.
